# Performance Measurement Update

Exactly how effectively does your facility manage ulcers?

**Audit care and track outcomes so that you know ...**

- ✓ Who has Ulcers and what types of ulcers
- ✓ Are they healed or unhealed
- ✓ Are they worsening or improving
- ✓ Does your MDS reflect your care planned treatments and vice versa
- ✓ What Risk Factors does the MDS declare? Are these assessed and documented
- ✓ Which residents have ulcers and low risk factors
- ✓ Which residents have healed ulcers, high risk factors and no preventative treatment

One report can give you all the answers ...

Resident Information				Decubitus Ulcer Report																						
Resident Name	Nursing Station	Room	ARD date	Unhealed Pressure Ulcers	Healed Pressure Ulcer	Other	Treatment	Pressure reducing device for chair	Pressure reducing device for bed	Turning/repositioning program	Nutrition/hydration intervention	Ulcer care	Surgical wound care	Application of non-surgical dressings other than to feet	Application of ointments/medications other than to feet	Application of dressings to feet	Risk	Stage 1	Formal Tool	Clinical Assessment	At Risk	Comatose	Bed Mobility - self	Bed Mobility - support	Prognosis less than 6 mos	
QgBBAEKATABFAKA, SQBEAEEA B	East	45-B	12/28/2010	0	1	1	1	0	0	0	0	0	0	0	1	0	0	0	1	1	1	1	0	2	2	0
